

HostGrap WhatsApp API V2 Documentation

Introduction

HostGrap WhatsApp API V2 allows you to send messages, media, polls, and manage WhatsApp status programmatically using simple HTTP POST requests.

Authentication

All API requests require authentication using your registered email and API key. Include them in every request.

```
email=youreemail@gmail.com  
api_key=YOUR_API_KEY
```

Send Text Message

```
curl -X POST https://wa-api.hostgrap.com/api/send-message.php  
-d "email=youreemail@gmail.com"  
-d "api_key=YOUR_API_KEY"  
-d "phone=947XXXXXXXXX"  
-d "message=Hello from HostGrap WA API"
```

Send Image

```
curl -X POST https://wa-api.hostgrap.com/api/send-image.php
